

Sustainable Biomass Energy Solutions

KEY IMPACTS

OPERATIONAL SINCE	NOV 2020
BRIQUETTES PRODUCED TO DATE	1014 TONS
DIRECT JOBS CREATED	23
INDIRECT JOBS CREATED	32
WASTE RECYCLED	1420 TONS
FOREST SAVED	72 HECTARES

OUR PRODUCTS

Ecological fuel briquettes:

Made from wood waste collected from local sawmills.

Efficient and high energy performance, low smoke emission.

Pellets (Expected launch: March 2025):

Innovative product suitable for modern stoves and boilers.

Yesterday's Waste—Today's Energy

Biogasikara Energy fights against deforestation in Madagascar by recovering agricultural and forestry waste to produce ecological fuels, meeting the sustainable energy needs of homes, businesses and industries.

PARTNERSHIPS

Miarakap :

SME Accelerator Program (supported by USAID)

Incubateur d'Énergie Durable (IED) :

Sustainable Energy Incubation Programme (supported by UNIDO)
